SANA FIRDOUS

sanafirdous.105@gmail.com | 6281188656 | www.linkedin.com/in/sana-firdous-b244892b3/

CAREER OBJECTIVE:

software engineer with a strong analytical mindset and a passion for solving real-world challenges through technology. Committed to building reliable, high-quality software solutions while embracing innovation, continuous improvement, and modern engineering practices.

EDUCATION

B-Tech (Information Technology)	**CGPA**	**(2022 - 2026)**
▪ VNR Vignana Jyothi Institute of Engineering & Technology	7.83	
Intermediate		**(2022)**
▪ Sri sanjeevni junior college	8.26	
SSC		**(2020)**
▪ Geetham High School	10.0	

TECHNICAL SKILLS

Programming Languages: Java , Python , SQL
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms , Software Development Life Cycle (SDLC)
Frameworks & Tools: GIT ,Power BI, Excel
Web Development: HTML, CSS, JavaScript , REST APIs
Data Science & Machine Learning: Machine Learning, NumPy, Pandas , Scikit-learn

EXPERIENCE

Synycs Group, Hyderabad.
Generative AI Intern — June 2025 – July 2025

- Collaborated with a project team to design, code, and test small-scale ML modules using iterative development and debugging practices.
- Assisted in data preprocessing, model validation, and issue triaging to ensure output quality.
- Documented experiment workflows and key findings for team reference.

PROJECTS

WellTrack AI – AI-Powered Health & Wellness Monitoring Platform:
Developed a full-stack AI-powered health monitoring platform using React, Node.js/Express, FastAPI, and MongoDB with a scalable microservices architecture. Integrated Scikit-learn and NLP models for nutrition analysis, activity recommendation, sleep quality assessment, sentiment analysis, and personalized wellness insights. Implemented secure RESTful APIs, JWT authentication, and efficient data processing pipelines to deliver intelligent, real-time health recommendations.

Smart Study Scheduler:
Designed an intelligent scheduler that uses ML and NLP to auto-generate optimized study plans, with a custom backend and interactive front-end using Python, JavaScript, and Scikit-learn.

Nutrition & Fitness Recommendation System:
Implemented an end-to-end nutrition intelligence platform using Python (Scikit-learn), Node.js/Express APIs, JavaScript-based dashboards, and data processing with Pandas/NumPy for automated macrocalorie prediction

CERTIFICATIONS / COURSES

- Neural Networks and Deep Learning (Coursera)
- Advanced Learning Algorithms (Coursera)
- DevOps on AWS: Operate and Monitor (Coursera)
- Participated inWebathon: Developed a full-stack project during the event
