## CAREER OBJECTIVE

Aspiring Software Engineer with hands-on experience developing full-stack applications and AI/ML solutions using Java, Python, SQL, and modern web technologies. Strong foundation in object-oriented programming, data structures, REST APIs, databases, and software development practices, with experience building practical, data-driven solutions. Seeking an opportunity to contribute to impactful software projects, apply strong problem-solving skills, and grow as a versatile software professional in a collaborative engineering environment.

## EDUCATION

| | | |
|---|---|---|
| **B-Tech (Information Technology)** | CGPA | (2022 - 2026) |
| VNR Vignana Jyothi Institute of Engineering & Technology | 7.83 | |
| **Intermediate** | | (2022) |
| Sri Sanjeevni Junior College | 8.26 | |
| **SSC** | | (2020) |
| Geetham High School | 10.0 | |

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, SQL

**Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Life Cycle (SDLC)

**Frameworks & Tools:** Git, Power BI, Excel, Node.js/Express, FastAPI

**Web Development:** HTML, CSS, JavaScript, React, REST APIs

**Data Science & Machine Learning:** Machine Learning, NLP, NumPy, Pandas, Scikit-learn

## EXPERIENCE

**Synycs Group, Hyderabad**

*Generative AI Intern — June 2025 – July 2025*

- Collaborated with a cross-functional project team to design, code, and test ML modules using iterative development practices aligned with structured SDLC workflows.
- Assisted in data preprocessing, model validation, and issue triaging to ensure output quality and support release readiness.
- Maintained version-controlled experiment workflows (Git) and documented key findings to support team knowledge transfer and future reference.

## PROJECTS

**WellTrack AI – AI-Powered Health & Wellness Monitoring Platform**

- Developed a full-stack AI-powered health monitoring platform using React, Node.js/Express, FastAPI, and MongoDB with a scalable microservices architecture.
- Integrated Scikit-learn and NLP models for nutrition analysis, activity recommendation, sleep quality assessment, and sentiment analysis.
- Implemented secure RESTful APIs, JWT authentication, and efficient data-processing pipelines to deliver real-time wellness recommendations.

**Smart Study Scheduler**

- Built an intelligent scheduler using ML and NLP to auto-generate optimized study plans, with a custom Python backend and JavaScript front-end.

**Nutrition & Fitness Recommendation System**

- Implemented an end-to-end nutrition intelligence platform using Python (Scikit-learn), Node.js/Express APIs, and JavaScript-based dashboards.
- Automated macrocalorie prediction and data processing pipelines using Pandas and NumPy.

## CERTIFICATIONS / COURSES

- Neural Networks and Deep Learning (Coursera)
- Advanced Learning Algorithms (Coursera)
- DevOps on AWS: Operate and Monitor (Coursera)
- Webathon — Developed a full-stack project during the event
